

Behind-the-Neck or Headband conversion to Helmet Mount:

- 1.) First you need to determine the type of hard Hat/Helmet you have, as we sell 3 types of adapters that are used to attach the headset depending upon the hard hat/helmet brand and model that the headset will be attaching too.

<https://shop.sensear.com/accessories-parts/helmet-mount-adaptors/>

Choose the adapter to fit your helmet:

The “**Type A**” (**SMHA0000**) option fits mainly to helmets of the following manufacturer series

- AO Safety
- Bullard
- Jackson
- NSA
- North
- Honeywell
- 3M

The “**Type B**” (**SMHA0001**) option, MSA V-guard helmet adapter, fits mainly to Australian helmets of the following manufacturer series:

- PROTECTOR ALSAFE #410, #620 (Australia)
- NZ SAFETY
- PROSAFE

The “**Type C**” (**SMHA0002**) option, MSA V-guard helmet adapter, fits mainly to European helmets of the following manufacturer series:

- CIGWELD Cigweld
- LAS LP2016 Saturno
- PARAMOUNT Prochoise HH6, HHV6
- PROTECTOR Tuffmaster II (Australia), Tuffmaster III
- SAYLENS Magnum
- JSP Blenheim, Executive 8, Surveyor
- PROTECTOR Tuffmaster I (HC-41)
- SCHUBERTH EuroGuard
- PETZL Vertex
- PROTECTOR Style 300, 600, 650
- SOFOP (taliplast) Oceanic II, Oryon
- UNISAFE UniLite
- VALLEN Valiant
- AO
- Domeguard
- PROSAFE
- 3M

2.) Next you will need to purchase helmet mount forks kit to complete the conversion, both (SMHA000x “Adapters” & SMMK0001 “forks kit”) are needed to do the conversion. Note: You need to be aware that the cable between the earcups on the Headband and Behind-the-Neck style headsets are a bit shorter than the cable on the actual helmet headsets, therefore you cannot use all three helmet cable adhesive mounts to mount the cable on the back of the helmet - I recommend only using one or two near the back center of the helmet. (This is fine and will work, people do it all the time so no worries about doing this, but it is obviously better to buy the actual helmet mount headset)

Here's the forks kit PN: SMMK0001: <https://shop.sensear.com/accessories-parts/helmet-mount-replacement-forks-for-smart-headsets/>

HELMET MOUNT REPLACEMENT FORKS FOR SMART HEADSETS

\$35

Sensear Part #: SMMK0001

Summary:

- Repair/refresh your Sensear Headsets with replacement helmet mount attachment forks.
- Includes helmet mount attachment parts for the Sensear Smart Headset family
- Helmet Mount Attachment Adapters (sold separately).
- Extend the life of your Sensear safety and communications gear!
