

# Sensear Charge Racks

A Convenient Charging Solution for Small to Large Scale Operations

• Communication • Awareness • Protection •

Sensear's Charge Racks are heavy-duty industrial charging solutions that allow for charging up to 45 headsets on a large scale and 6 headsets on a small scale. With three different-sized racks, these are great solutions for companies with numerous headsets in operation at any given time on multiple shifts and/or for plant tours and training facilities.

Keep your headsets ready to go for your next workgroup, tour, or training group, so workers, guides, and participants or teachers and students can benefit from all of the great features these headsets have to offer, including Sensear's industry-leading SENS® Technology that enhances speech and suppresses background noise so users can communicate safely and effectively in noisy environments.

## FEATURES AND BENEFITS

- Complete solutions for all Sensear headset styles in any combination (Headband, Behind-the-Neck, and Helmet Mount)
- Tabletop, desktop, and floor solutions
- Single and double-sided solutions for extra capacity
- Charge up to 45 headsets on a large rack and 6 headsets on a small rack from a single AC outlet
- 15 ft cord
- Small footprints
- Rugged Heavy-Duty Rack Design
- Four heavy-duty caster wheels for easy relocation on larger racks
- On site rack assembly is required
- Easy to follow instructions are provided
