

# FM Radio Feature

## Procedure to turn FM Radio on:

1. Power off the headset
2. Power up the headset in manual configuration mode. To do this press and hold the Volume + button. Then short press the power button while holding down the volume (+) button. Listen to the headset announcement. It should say "System Set Up, Short Range Region 1"
3. You are now in the manual configuration mode menu.
4. Press the power button (short press) 2 times. You should here the announcement "FM Radio Disabled"
5. Press the Volume (-) button once (short press) You should here the announcement "FM Radio Enabled"
6. Power down the headset to save the changes

## Once FM Radio is enabled you will need to turn on the FM radio feature

To do this:

1. With the headset turned on put the headset in quiet mode by short pressing the power button once.
2. Next press the Multi-Function Button (on the left earcup) and the power button simultaneously. This will turn on FM radio and you should hear the FM channel through the headset speakers.
3. To scan to the next strongest station, press and hold the volume (+) button until you hear the station change and the announcement will state the new frequency.

Turn the headset FM radio back off by simultaneously pressing the multifunction button and the power button again.
