

## SMART EARMUFF

# USING THE HEADSETS

Sensear's Smart SENS® Earmuff Headset serves three purposes: hearing protection up to 27dB NRR, enhanced face-to-face speech communication, and 360° situational alertness.

With the Smart Earmuff, users will protect their ears and hear their peers. This is achieved through Sensear's industry-leading SENS® Technology which enhances speech and suppresses background noise so users can communicate face-to-face safely and effectively in noisy environments.

This headset has several applications, including recreation (ATVs, helicopter rides, gun ranges, etc.), lawn service/maintenance (listen to FM/AM radio), and workshops (metal/woodworking).

---

## ENVIRONMENTAL MODES

### **SENS® (Speech Enhancement Noise Suppression) Technology**

When the headset is powered on, it is automatically in SENS® mode, which allows 360° situational awareness of surroundings and face-to-face communication. By pressing the power button, you can toggle between SENS® mode (green LED light will blink twice every 4 seconds) and Quiet mode (green LED light will blink once every 4 seconds). Quiet mode only allows audio from communication devices to pass through the headset. The volume control buttons can be used to raise or lower the audio level of SENS®.

The Smart Earmuff is a SM1P Student Headset and will automatically be in Short-Range mode when powered on for the first time. Short-Range will need to be turned off when the headset is powered on by short pressing the volume buttons simultaneously. This will ensure that Short-Range remains off every time the headset is powered on.

# CHARGING

The headset should be regularly charged. To charge your headset, connect the charger to the headset and connect to the main power.

While charging the **Right Indicator LED** will be **Red**.

When charging is complete the **Right LED** will turn **Green**.

If **battery is low**, the **Right LED** will **flash Red** (when the unit is turned on)

**Note:** Be sure to charge your headset fully before first use.

**Note:** Your headset will automatically power up when the charger is connected to the headset.

**Charge Time:** 5 hours                      **Battery Life:** 24 hours

---

## HEADSET BUTTONS

### **Power On / Off**

To power up your headset, press and release the power button. To power off your headset, press and hold the power button until the unit powers off.

### **Volume Up / Down**

Volume buttons are on side of earmuff above power button. Each press raises the volume one notch. You will hear a single beep in your ear. Once you reach the highest volume level, you will hear a double beep.
